Hey Pat,  

Greetings from the MotorCity. I'm wondering if you and your group might be interested in writing a book chapter on Middle ear Power Reflectance for a book we're editing entitled "Scientific Foundations of Audiology,..."  

Since you've been at the forefront of this area for many years, the work of you and your colleagues (including Harry Levitt) would make an important contribution. We already have an impressive array of world class authors that will be contributing. The chapter will be ~20 pages and will be due by June 2015.  

I've attached a philosophical blurb about the book and authors that will be writing chapters.  

Let me know if this is something you and your group might be interested in.  

Best regards,  

Anthony T. Cacace, Ph.D. (Tony)
